Professional Summary

Detail-oriented Quality Assurance Engineer with hands-on experience in automated testing using TypeScript and Playwright. Skilled in identifying defects, improving test coverage, and collaborating with cross-functional teams. Passionate about delivering high-quality software and optimizing testing processes.

Technical Skills

- **Languages:** Java, C, C++, JavaScript, SQL, PHP
- **Frontend:** HTML, CSS, React
- **Testing:** Playwright, Automated Testing, End-to-End Testing
- **Tools:** GitHub, Jenkins, Linux
- **Database:** MongoDB

Experience

EZWhale – Quality Assurance Engineer (Part-Time) (Jan 2025 – July 2025)

- Developed and executed automated end-to-end test scripts using TypeScript and Playwright, increasing test coverage.
- Reduced manual testing effort by automating repetitive test cases.
- Identified, documented, and tracked bugs across multiple features and user flows.
- Collaborated with developers and product teams to resolve issues faster and improve product quality.
- Contributed to stable release cycles by delivering testing tasks on time.

Private Tutor – Computer Science (March 2023 – March 2025)

- Taught Web Development, OOP, and Mathematics to university students.
- Improved student performance through simplified explanations and structured sessions.
- Helped students achieve better exam results and understanding of core concepts.

Projects

Automated Testing Framework for EZWhale

- Designed and implemented a scalable testing framework using TypeScript and Playwright.
- Ensured reliability of core user journeys through automated validation.

QR-Based Attendance System

- Developed a full-stack web application using React and PHP.
- Improved attendance tracking efficiency through QR-based automation.

Education

Lebanese International University (LIU)

Bachelor of Science in Computer Science (2022 – 2025)

Additional Learning: YouBee Platform (HTML, CSS, JavaScript, MongoDB)
